MOHAN BABU UNIVERSITY

Anveshana Club

UI/UX Design Brief & Token System

STATUS: FINAL BASELINE

CINEMATIC PORTAL ARCHITECTURE

1. Brand Identity

- **Club Name:** Anveshana Club
- **Institution:** Mohan Babu University (MBU), Tirupati
- **Tagline:** "Explore · Build · Bring Ideas to Life."
- **Core Attributes:** Curiosity, engineering innovation, experimentation, and student collaboration.
- **Design Philosophy:** The interface must evoke a sense of premium collegiate prestige and cinematic exploration (inspired by the sunset campus poster) while maintaining the structural clarity and high accessibility standards of a professional academic portal (inspired by the AICTE Internship Portal).

2. Visual Direction

- **Cinematic Hero:** Spacious layouts utilizing edge-to-edge campus imagery treated with warm, sunset-toned overlays to ensure text legibility.
- **Typography:** An oversized, elegant serif for the primary brand title and major section headings. A highly legible, modern geometric sans-serif for UI elements, body text, and the dashboard.
- **Color Palette:** Deep, inky navies and near-blacks anchoring the layout, punctuated by warm golden-orange accents for primary actions. Backgrounds utilize warm ivory and light neutral surfaces.
- **Motifs & Accents:** Subtle, hand-drawn innovation motifs (e.g., circuitry, lightbulbs) used as low-opacity background elements.
- **Shadows & Depth:** Restrained use of soft, diffuse shadows. Depth is primarily achieved through color contrast and overlapping layout techniques.

3. Design Tokens (Colors)

Hex values are proposed design tokens and should be mapped to CSS/Tailwind variables.

Token	Hex Value	Purpose & Application
Primary Navy	#0B132B	Headers, footer, primary typography, cinematic image overlays.
Secondary Navy	#1C2541	Card backgrounds (dark mode), secondary UI elements.
Golden-Orange	#F5A623	Primary CTAs, active states, brand accents, hover effects.
Warm Ivory	#FDFBF7	Primary background color for public-facing content sections.
Surface Light	#F3F4F6	Card backgrounds, input fields, admin dashboard background.
Text Primary	#0F172A	Default body copy on light backgrounds.
Text Inverse	#F8FAFC	Text on navy/dark backgrounds.
Border Muted	#E2E8F0	Dividers, subtle card borders, inactive inputs.
Status: Success	#10B981	Success toast messages, "Registration Open" badges.
Status: Error	#EF4444	Form validation errors, destructive action buttons.

TYPOGRAPHY, SPACING & LAYOUT TOKENS

Category	Token / Value	Description
Font Family (Display)	`Playfair Display`, serif	Brand title, Hero h1, major section h2s.
Font Family (UI/Body)	`Inter` or `Figtree`, sans	Body copy, navigation, buttons, Admin dashboard.
Type Scale	Base: `16px`	Scale: 1.250. h1: 3.05rem, h2: 2.44rem.
Spacing Scale	4px increments	`space-1`: 4px, `space-4`: 16px, `space-8`: 32px.
Border Radius	`sm`, `md`, `lg`	Buttons (4px), Cards (8px), Modal windows (12px).
Shadows (Elevation)	`shadow-sm`, `md`	Soft, diffuse `rgba(11, 19, 43, 0.08)`. Avoid harsh lines.
Animation/Motion	`200ms ease-in-out`	Button hovers, accordion expansions, fade-ins.

4. Public Website Screens

HOME PAGE

Header: Transparent background on load (text inverse), transitioning to solid Primary Navy on scroll. Contains Logo, Nav links, and a subtle "Contact" button. No Admin link.
Hero Section: Full viewport height. Background: High-quality campus sunset image with a #0B132B gradient overlay (60% opacity). Large Serif Title. Primary CTA: "Explore Events" (Golden-Orange).
Mission/About: Warm Ivory background. 2-column layout on desktop.
Event Highlights: Horizontal scrolling container (mobile) or 3-column grid (desktop) showing the next 3 upcoming events.

EVENTS LISTING

Layout: Surface Light background. Page title in Serif.
Controls: Sticky filter bar (Status: All, Upcoming, Completed | Timeline: Month/Year).
Cards: Image banner (16:9), Date badge (overlapping image), Title, 2-line excerpt, Status Badge, "View Details" text link.
States: Skeleton loaders for initial fetch. "No events found" empty state with an illustration.

EVENT DETAILS

Hero: 33vh banner image with the event title overlaid.
Content Split (Desktop): Left (66%): Description, Event Gallery (Image Grid). Right (33% - Sticky): Event metadata card (Date, Time, Venue, Eligibility).
Registration CTA: Prominent button linking to Google Forms. Upcoming: "Opens [Date]" (Disabled). Open: "Register Now" (Golden-Orange). Closed: "Registration Closed" (Gray).

EVENT GALLERY

Responsive Grid: A masonry layout for completed events.
Interaction: Accessible image previews via a lightbox overlay with previous/next keyboard navigation. Captions displayed beneath images when available.
States: Loading spinners per image. Empty state text if the event is marked completed but lacks photography.

CORE TEAM

Layout: Grid of accessible Accordions categorizing teams (e.g., Team Leads, Tech Team).
Member Cards: 1:1 aspect ratio profile image. Name (bold), Role (muted). Hover state reveals LinkedIn/GitHub icon links.
Missing Data: If no photo exists, use a stylized monogram placeholder utilizing the Primary Navy and Golden-Orange palette.

FEEDBACK AND CONTACT

Layout: Split screen. Left: Contact info (Email, Location) and map. Right: Feedback Form.
Interaction: 5-star interactive SVG rating. Standard input fields. Inline validation (red borders for errors). Success state replaces form with a "Thank You" message.

5. Admin Interface

Strictly practical, sans-serif dominant, and distinct from the cinematic public UI. Optimized for data density and speed.

- **Admin Login:** Minimal, centered card on a gray background. Username/Password. No public registration option. Hidden from main navigation.
- **Dashboard Overview:** Sidebar navigation (Events, Team, Feedback, Settings). Main content area features quick stats (Total Events, Pending Feedback).
- **Event Listing:** Dense data table. Columns: Title, Date, Status, Registrations (Link), Actions (Edit/Delete).
- **Form Management:** Standardized form layout. Drag-and-drop zone for Cloudinary image uploads (Banner/Gallery). Unsaved changes trigger a browser warning if navigating away.
- **Confirmation Dialogs:** Destructive actions (Delete Event, Delete Member) trigger a modal requiring explicit user confirmation (Red "Delete" button vs. Gray "Cancel").
- **Feedback Review:** Read-only table interface.

6. Component Design System

Component	Variants / States	Interaction / Styling Rules
Buttons	Primary, Secondary, Ghost	Primary: Golden-Orange bg, Navy text. Hover: 10% darken. Disabled: Gray bg, lowered opacity.
Event Card	Default, Hover, Skeleton	Hover: Elevates from `shadow-sm` to `md`, image scales 105% within masked container.
Status Badge	Upcoming, Open, Closed	Small text, uppercase, pill shape (rounded-full). Colors defined in tokens.
Team Accordion	Collapsed, Expanded	Click header to toggle. Chevron icon rotates 180°.
Form Inputs	Default, Focus, Error	Focus: 2px Golden-Orange ring. Error: 2px Red ring + helper text below input.
Toast Alert	Success, Error, Info	Slides in from bottom-right. Auto-dismisses after 4 seconds.

7. Responsive Design and Accessibility

- **Layout Adapts:** Stacked columns, hamburger menu navigation, full-width buttons, and horizontal scrolling for overflowing tabs on mobile (`<768px`). Multi-column grids and sticky sidebars on desktop. Minimum 44x44px touch targets.
- **Accessibility (WCAG AA):**
  - Semantic HTML5 structure (`<header>`, `<main>`, `<nav>`).
  - `aria-labels` on all icon-only buttons (e.g., social links).
  - Keyboard navigation support with visible focus rings (`focus-visible:ring-2`).
  - Color contrast ratios strictly adhered to.

8. Image and Motion Guidelines

- **Image Treatment:** Hero/Banners use a 16:9 ratio with gradient overlays to guarantee text contrast. Team Photos use a 1:1 ratio (center-cropped). Galleries use a standardized grid or masonry layout with `object-fit: cover`.
- **Optimization:** Implement lazy loading (`loading="lazy"`) for all below-the-fold imagery. Provide blurred placeholders or solid color skeletons during network fetch. Never assume a banner exists.
- **Motion:** Limit animations to micro-interactions (button hovers, dropdowns, accordion expanding). Page transitions should be instant or cross-fade in under 200ms. Respect `prefers-reduced-motion`.

9. Deliverables & Acceptance Criteria

For development handoff, the UI/UX implementation must meet the following criteria to be considered complete and ready for production:

1. **Design Principles:** The public face must remain cinematic and visually engaging, while the admin dashboard remains dense, practical, and highly utilitarian.
2. **Color & Typography:** Implementation exactly matches the primary hex codes and the two font families (Serif for display, Sans for UI) specified in Section 3.
3. **Sitemap Mapping:** All routes specified in the PRD and App Flow documents are visually accounted for without introducing orphan pages or dead ends.
4. **Responsive Matrix:** The UI does not break on 320px screens. Desktop layouts utilize max-widths (e.g., `max-w-7xl`) to prevent excessive stretching on ultra-wide monitors.
5. **Component Inventory:** Reusable React components are created for Buttons, Cards, Badges, and Form Inputs prior to assembling the final pages.
6. **Accessibility:**
   - A user can navigate the entire public site using only the `Tab` key.
   - Screen readers can access all visual information via proper `alt` tags and ARIA labels.
7. **Image Fallbacks:** Every image component has a coded fallback (placeholder monogram, icon, or color block) if the Cloudinary URL fails or is absent from the database.
8. **Form Validation States:** The UI clearly displays success and error states on the Contact form and all Admin CRUD forms without relying solely on browser default alerts.
9. **External Link Handling:** All Google Forms registration links open in a new tab (`target="_blank"`) with `rel="noopener noreferrer"`.
10. **Aesthetic Cohesion:** The final build's visual weight, spacing, and typography scale visually match the premium aesthetic implied by the original Anveshana sunset poster.
